

CAnD3 RRWM: Spouse's Employment Status on Respondent's Health Outcomes

This Github repository contains the do.file, data file, and program template required to replicate this study on partner's employment status on respondent's physical health outcomes. This replication uses the GSS 2017 Family Cycle 31 data set.

What is included:

- Data_Accessibility_Statement file required to access the raw data.
- Program template which contains the specific steps to complete the replication.
- The .png files contain images of the tables and 3 regressions performed.

Next steps:

- Download the GSS 2017 Family Cycle 31 data set (refer to the Data_Accessibility_Statement).
- Save the data set to your computer.
- Open STATA and produce the variables required to run the tables and regressions (refer to the program template).

Software

- StataNow/SE 19.5
